

PART 512 – CONSTRUCTION

SUBPART D – QUALITY ASSURANCE ACTIVITIES

PA512.32(d)

§PA512.32 Quality Assurance Procedures.

a) Uniform Implementation.

- (1) Quality assurance activities on every conservation practice installation shall address all the items in the Construction/Check Data section of the Design and Check Data Requirements in the conservation practice standard.**

b) Class I – IV practices

- (1) The designer shall identify in the design any unique aspects of the site conditions or installation procedure of which the quality assurance provider must be aware.**

c) Class V – VIII practices

- (1) The QAP shall be prepared by the designer and shall be site specific, addressing the unique aspects of the practice installation and the site conditions, as applicable.**

- d) In addition to the requirements in items (a) through (c) above, a QAP shall be developed and implemented for any project that includes a Waste Storage Facility (313), a Waste Treatment Lagoon (359), or an Anaerobic Digester (365, 366).**

PA512-19(1)
